VENICE GULF COAST LIVING MAGAZINE

**A**s time goes by in the Sunshine State, there are some constants such as the warm temperatures and the beauty that abounds! I like to call our quarterly metamorphosis “a shift of the sunshine seasons” simply because here in paradise, with every turn of the new season, the great, big golden globe up in the sky almost always shines!

In the fall, long days grow shorter, and the autumn sun continues to glow. The harvest season reveals its beauty with a bountiful array of fragrant flowers and tropical fruits drenched in vibrant colors. It’s fall in the Sunshine State!

*Tropical Splendor*

In the winter, we are treated to the sun’s brilliance when it shines upon our gulf waters like dancing beams of light. As they migrate to paradise, exquisite birds charm us with their appearance, decorating our trees with their iridescent, grand wings and beautifying our landscape.

*Iridescent Glow*

*Nature's Gold*

As spring ushers in symphonies of refreshing rain, sun-kissed dewdrops appear on flowers like shiny diamonds, making the blooms sparkle bright. Before we know it, butterfly wings grace our gardens and remind us that spring has just flitted by.

*Sign of the Times*

Summer brings us strong sunbeams, making the days perfect for a trip to the shore and the promise of a tangerine evening sky. We journey through a hot day in paradise and the silent night makes way for a new morn.

*Sunshine Splendor*

Many would say that it is easy to get lost in the glittering delights of paradise with its majesty of fresh air, beautiful blue sky, and its enchanting swaying palms.

Oh, how I love the sunshine seasons. I wonder...who could want for more?
