Blueberry Coconut Dreamsicles

Ingredients

One 14-oz. can coconut milk, divided

2 Tbsp. light agave nectar

1 tsp. pure vanilla extract

1 cup frozen blueberries

Directions

Pour 1 cup of the coconut milk, agave nectar and vanilla extract into a blender and process for a few seconds to mix. Transfer blended milk into a spouted glass measuring cup and set aside. Add blueberries and remaining 1/2 cup of coconut milk to the empty blender and pulse for 15 to 20 seconds. Pour some of the milk into popsicle molds, followed by the blueberry mixture and ending with more milk. Place a skewer down the middle of each mold and swirl once or twice to produce a marble effect. Place popsicles in freezer for several hours until solid or leave in overnight.
